### About the Author

**H. G. Wells**

Born in Bromley in Kent, England, Herbert George “H. G.” Wells (1866-1946) has been called the father of science fiction. His most notable works include the War of the Worlds (1897), the Time Machine (1895), the Invisible Man (1897), and the Island of Doctor Moreau (1896). Wells also wrote on topics related to history and social commentary and was involved in politics for much of his life. Novels like Kipps and the History of Mr. Polly, which describe lower-middle-class life, led to the suggestion that he was a worthy successor to Charles Dickens. After living through two World Wars and seeing Orson Welles’ broadcast of the War of the Worlds strike panic in listeners, Wells died in London on August 13, 1946. The Invisible Man remains a remarkable work of science fiction, revealing the destructive effects science can

have on humanity.

## Product Description

A Short History of the World is a book written by H.G. Wells, first published in 1922. It is an attempt to provide a broad overview of human history, from the origins of the Earth and life to the early 20th century, presented in a succinct and accessible way. Wells, a prolific British writer known for his works on science fiction, history, and social commentary, approaches the history of the world in this work with his characteristic style of clarity, storytelling, and a focus on the larger forces shaping human development.
