About the Journal

Journal of Combinatorics & System Sciences (JCISS) publishes significant original papers and survey articles on important advances, carrying theoretical and practical results of Mathematical orientation in any one of the following major areas:
Combinatorics (e.g., Graph Theory, finite Geometries, Combinatorial Geometries, Combinatorial Problems in Number Theory and Abstract Algebra, Coding Theory, Block/Factorial Designs, Search and Combinatorial Problems in Statistical Inference).
Information Theory (e.g., The Shannon Theory, Rate-Distortion Theory, Theory of Error-Correcting Codes, Detection and Estimation, Communication, Sampling Theorems, and Stochastic Processes, Pattern Recognition, Measures of Information and their Applications in Physical Sciences, Social Sciences, Commerce and Business Management, Humanities, and Statistics)
Mathematical System Theory (e.g., Topological Dynamics, Theory and Dynamical Poly systems, General System Theory, Formal System Theory, Reliability Theory and Practice, Mathematical Theory of Automation and Algorithms, Algebraic System Theory, Ergodic Theory, and Mathematical Linguistics)
Computational Intelligence Techniques (e.g., Fuzzy set theory and its generalizations, Soft set theory, Computing with Words, Neutrosophic Sets, and Systems, Interval Analysis, Rough Sets, Algorithmic Developments and Applications in Real-Life Problems.
Journal of Combinatorics & System Sciences is published four times a year. As a result, the journal serves as a forum for all researchers and practitioners engaged in research and development in these fields.
Journal of Combinatorics & System Sciences also presents refereed surveys, book reviews, tutorial articles, and comments on already published papers in JCISS. Special issues devoted exclusively to any important subarea of the journal may also be published.
